

Head Banker

Multiplier of Gold

“Money is my game, and I don’t care where I get it from.”

Setup

1. Take the Coins and Commodities and put them near you in plain sight of all players.
2. Sit to the left of the Chief Scribe.
3. Choose a color then take the Player Screen, Leaders (dice), Alliance Tokens, and one Card Marker of your color. Place everything behind your Player Screen.
4. Place one of your Alliance Tokens on the start of the Honor Track.
5. Keep one of your Alliance Tokens for each player (including yourself) and put the rest back in the box.
 - a. You should start with 6 Alliance Tokens in a 6-player game.

Checkpoint

1. Find one copy of the following Investments and put them face-up in front of your Player Screen:
 - a. BULK PURCHASER
 - b. CARAVANSARAY
 - c. INSPIRING COMMAND
 - d. COURTROOM GAMBLING
2. Place a non-player die, with value 2, on each of your Investments, denoting their level.
3. Move four of your Leaders out in front of your Player Screen, each with level 2. The rest of your Leaders cannot be used yet.
4. Find one copy of the following Law, place one of your Card Markers on the top of the card, and place it face-up at the front of the Law Queue.
 - a. HONORABLE MARKETPLACE
5. Find one copy of the following Investment and put it in your hand.
 - a. BOASTING PROPAGANDA

Checkpoint

1. Give 3 Coins to each player.

“These are your starting Coins. Keep them behind your screen since they are private information.”

2. Place 1 Coin per player in the Royal Bank.

“These are the Coins the King has allocated to our Provinces to use. If we take too many of these Coins without putting any back, the King will give us no more money for the rest of the round.”

Round 1

Action Phase

1. **Court Buy** 6 Commodities using 2 Coins.

“This Market Rate is in a pretty decent spot to buy some Commodities, so I will do so, trading with the King to get the best rate. I will put two of my Coins into the Royal Bank and gain 6 Commodities. I can trade up to one Coin per level of the Leader I have, so my max is two. Now that my trade is complete, the Market Rate shifts accordingly. The arrow on the Buy and Sell action spaces determines the direction in which to move the Market Rate. Buying lowers the Market Rate by one, so I will set it to 2. Buying Commodities just got a little worse, but Selling got better.”

2. **Deploy** 2 Troops for no Coins.

“I will also Deploy some Troops, but the Royal Bank is empty, so I don’t get any immediate compensation for my contribution.”

3. **Negotiate** with the Crime Lord to exchange 2 Alliance Tokens.

“I want an ally at this table of suspicious people, so I will Negotiate with the Crime Lord. We will both place a leader on the action space, and we will exchange one Alliance Token for each level of the weaker of the two Leaders. In this case, we each played a Level 2 Leader, so we will exchange 2 Tokens. These will allow us to make powerful trades during the game and may count as Honor at the end of the game. All of this counts as my turn, not the Crime Lord’s, but he does use up one of his leaders to do this.”

4. **Promote** a Leader to Level 3.

“I want a more powerful action, so I will Promote my Leader to immediately increase his level by one. I don’t get to use him this round, but he will help a lot next round.”

Report Phase

1. After checking the Greeks for the end of the game,

“The King has many other financial interests apart from our unreliable provinces and has made some money. I will add one Coin per player to the Royal Bank for us to use next round.”

2. Immediately after,

“To reflect the impact of the King’s new allocation, the Market Rate shifts. The current value is 2. I will roll the Market Rate and adjust it up to 1 in the direction of the result, so it is likely to increase. For the sake of simplicity, I will keep rolling until I see a result greater than 2. This will cause the Market Rate to go up to 3. If I had rolled a two, the Market Rate would have stayed the same. If I had rolled a 1, the Market Rate would have decreased. Remember, the Market Rate will only shift up to 1 space, up or down, at the end of this phase.”

Round 2

Action Phase

1. **Private Sell** 3 Commodities for 3 Coins using CARAVANSARAY and a Level 3 Leader.

“This Market Rate isn’t the best for selling, but I’ve got a Caravansaray which gives me a much better rate. It’s also a private action, so I know none of you will be able to block it. I can only use it once per round, but that’s fine. For this action, I will place my leader on the investment and trade up to 3 Coins with the Free Bank. The current Market Rate is 2, and my investment decreases that to 0. The Market Rate can never go below 1 or above 6, even with bonuses like this card, so my rate is 1. The 3 Coins I gained only cost me 3 Commodities total. Great deal! The Market Rate now goes back up to 3.”

2. **Deploy** 2 Troops.
3. **Collect**
4. **Build** a Level 2 Investment (BOASTING PROPAGANDA), spending 2 Commodities.

“We’re nearing the end of the game, so I am going to build this new Investment to be able to convert more Coins into Honor using Donate. When building an Investment, the new Investment can have a maximum level of my Leader’s Level, and I must pay 1 Commodity per level the Investment starts with. This Investment can go up to Level 2, and I’ve got plenty of Commodities, so I’ll start it at Level 2.”

Report Phase

1. After setting the Threshold of the new Deliberated Law,

“Time to get some more money from the King! I will add one Coin per player to the Royal Bank for us to use next round.”

2. Immediately after,

“The current Market Rate is 3. I will roll the Market Rate and adjust it up to 1 in the direction of the result. For the sake of simplicity, I will keep rolling until I see a result greater than 3, causing the Market Rate to go up to 4. If I had rolled a 3, the Market Rate would have stayed the same. If I had rolled a 2 or less, the Market Rate would have decreased to 2.”

Round 3

Action Phase

- At some point in the next round, subtly **scheme** against the Veteran with yourself as the Receiver.
 - Choose a scheme card that has a “Receiver” from your hand and grab a card marker for the Veteran and one of your own from your pouch.
 - Put the Veteran’s card marker on the top of the scheme card (the target of the scheme) and yours on the bottom (the Receiver of the scheme).
 - Put the marked scheme card into the pouch with all the rest of the card markers.
 - Put your Spy into the pouch.
- 1. **Private Sell** with a Level 2 Leader.
 - a. After this action, the Crime Lord will want to give you his extra Coins. Take them and give him your extra Commodities. You won’t need any more.
- 2. **Sue** Veteran with a Level 2 Leader.

“I’m tired of the Veteran sitting around over there, all comfortable with his Troops! Meet me in the courtroom!”

3. **Undermarket Donate**

“I also have a lot of Coins I would like to convert into Honor, but the Veteran already used the Court Donate, so I need to go to the Undermarket to Donate. For this Undermarket action, the penalty is a single Coin to the Royal Bank. After the fee is paid, like the Court

action, I may Donate one Coin per Leader Level to the Royal Bank and gain half (rounded up) the number of donated Coins in Honor.”

Report Phase

1. After setting the Threshold of the new Deliberated Law,

“Adding Coins to the Royal Bank won’t matter much, but I’ll do it for the sake of completion.”

2. Immediately after,

“The current Market Rate is 3. I will roll the Market Rate and adjust it up to 1 in the direction of the result.”
