

Warmonger

Fist of the King

"I will do what is necessary for victory, and I don't care who I have to run through to get there."

Setup

1. Take the non-player dice and put them near you in plain sight of all players.
2. Take the Battlefield and put it in a central place of the table.
3. Choose a color then take the Player Screen, Leaders (dice), Alliance Tokens, and one Card Marker of your color. Place everything behind your Player Screen.
4. Place one of your Alliance Tokens on the start of the Honor Track.
5. Keep one of your Alliance Tokens for each player (including yourself) and put the rest back in the box.
 - a. You should start with 6 Alliance Tokens in a 6-player game.

Checkpoint

1. Find one copy of the following Investments and put them face-up in front of your Player Screen:
 - a. WAR MACHINES
 - b. DESPERATE ATTORNEYS
 - c. EAGER LABORERS
 - d. VALUABLE CARGO
2. Place a non-player die, with value 2, on each of your Investments, denoting their level.
3. Move four of your Leaders out in front of your Player Screen, each with level 2. The rest of your Leaders cannot be used yet.
4. Find one copy of the following Law, place one of your Card Markers on the top of the card, and place it face-up at the front of the Law Queue.
 - a. VALUABLE CARGO

Checkpoint

1. Place 5 Troops per player in the Greek Reserves of the Battlefield

“This is the full Greek army. Every round, some Greeks will come to attack us. If we fail to defend against them, they will hurt us. The game is over once the Greek army has been completely eliminated.”

2. Place one non-player die on the Market Rate and set its value to 3.

“This is the Market Rate. It represents the current value of Commodities in this kingdom. Normally, I would roll this die and use the result, but for the sake of simplicity, I will set it to 3. This means 1 Coin is worth 3 Commodities. The Market Rate will change as we Buy and Sell, so it pays to keep an eye on it.”

Round 1

Action Phase

1. **Deploy 2 Troops** and buy 1 extra using **WAR MACHINES**.

“I will also Deploy some Troops to fight off the Greeks. Thankfully, this is a Provincial action, so I can take the action even though another player already used it. Court actions are the only ones that another player may block. Each player can take a Provincial or Undermarket action once per round. For this Deploy action, I have War Machines which allows me to buy extra Troops and Deploy them immediately. I will deploy 2 of my own and purchase 1 War Machine. That gives me the most deployed Troops, so I will be General at the end of the round now. The King pays me for half (rounded up) of my deployed Troops, so I will take 2 Coins from the Royal Bank.”

2. **Brainstorm** to draw 2 cards from each deck.

“I need better cards than what I have, so I will Brainstorm some new ideas. This action gives me 1 card from each of the three decks for each of my Leader’s levels. I played a Level 2 Leader, so I will draw a total of 6 cards, 2 from each deck.”

3. **Sue** with a Level 2 Leader and pay 1 Coin to the Royal Bank using **DESPERATE ATTORNEYS**.

“The Master of Lies and I have past disagreements that were so bad I am willing to fight him now within the courtroom. As the plaintiff, I will send a Leader to represent me, and I must pay legal fees equal to half (rounded up) of my Leader’s level. Since my leader is Level 2, I will put 1 Coin into the Royal Bank. Now, the defendant, the Master of Lies, will send one of his unused Leader to represent him, and he must pay also legal fees to the Royal Bank. Now that we have both sent our representatives, the legal battle may begin. Each of us takes on non-player die for each of our respective Leader’s levels. I will take 2 dice for my

Level 2 Leader, and the Master of Lies will do the same for his Level 2 Leader. My Desperate Attorneys Investment gives me 2 additional dice, so I will take those. Next, we roll! Each die that shows a 4 or higher scores a point. Dice that show 3 or lower do nothing. The player who scores the most hits wins the round. The player who wins the best out of three rounds wins the Trial. Remember that ties during a round are arbitrated by the holder of the King's Favor, so you may want to keep him as your friend. Once a winner has been decided, the winner takes their Coins back from the Royal Bank and half of the opposition's Coins. The winner also receives 1 Honor for being proven right in such a public setting. The loser receives nothing."

4. Harvest 6 Commodities using EAGER LABORERS.

"I need some Commodities, but the Market Rate is not in a helpful spot, so I will simply Harvest. My Eager Laborers Investment gives me 2 extra Commodities though, so I will take 6 Commodities, 4 for my Leader and 2 for my Investment."

Report Phase

1. After Edicts have been checked,

"Now comes the battle. A portion of the Greek army has finally met ours, and we find out who wins. Thankfully, the outcomes of battles are very easy to predict: each opposing Troop cancels the other out, and whichever side has Troops left wins! We win ties, of course. Before the battle starts, we need to appoint a General to lead our united forces, and the player who deployed the most Troops first immediately receives 1 Honor. In this case, I deployed the most Troops, so I get 1 Honor. We don't fight the entire Greek nation at once, so I will roll 1 non-player die per player and sum half (rounded up) of each die. For example, in a 6-player game, if I roll a 6, 5, 4, 3, 2, and 1, the total will be 12. 6 and 5 get halved to 3 each, 4 and 3 get halved to 2 each, and 2 and 1 get halved to 1 each. The sum of the roll determines the number of Greeks we have to fight this round. If the sum is higher than the number of Troops we deployed this round, we lose, and any remaining Greek Troops all attack the player who deployed the fewest Troops last. In this case, the Crime Lord is on the chopping block because he was the only one to not deploy any Troops. If the sum of the roll is lower than or equal to the number of Troops we deployed, we win the battle, and everyone who deployed Troops immediately receives 1 Honor. Any of our remaining Troops kill an equal number of Greek Reserves then are discarded. For this round, we must fight ___ Greeks. Any leftover Greeks will attack the Crime Lord, and he must kill an equal number of his Troops. If he does not have enough Troops, the remaining Greeks will damage his Investments."

2. After setting the Threshold of the new Deliberated Law,

“There are still Greeks left, so we will play another round.”

Round 2

Action Phase

1. **Upgrade** an Investment (EAGER LABORERS) by 2 levels, paying 2 Commodities.

“I want to improve one of my Investments, so I will Upgrade my Eager Laborers with a Level 2 Leader. This enables me to increase the level of my Investment by 1 for each of my Leader’s Levels, provided I pay 1 Commodity per level I want to increase by. I will pay 2 Commodities to increase this Investment to Level 4.”

2. **Deploy** 2 Troops and buy 1 extra using WAR MACHINES.
3. **Prioritize** your Law in the Queue.

“I really want to get my Law ratified, so I will Prioritize it. This enables me to move it 1 space forward in the Queue per Leader Level, but the Law moved never becomes the Prioritized Law. I will move my Law 2 spaces forward, which will make it the Deliberated Law next round.”

4. **Recruit** 2 Troops.

Report Phase

1. After the battle is over,

“Everyone take your Leaders back. Make sure to not change their values!”

Round 3

1. After Edicts have been checked,

“It’s battle time again. I deployed the most Troops again, so I get 1 Honor. Once again, the Crime Lord is on the chopping block because he was the only one to not deploy any Troops. This round, we must fight ___ Greeks. Any leftover Greeks will attack the Crime Lord, and he must kill an equal number of his Troops. If he does not have enough Troops, the remaining Greeks will damage his Investments.”

2. When the Chief Scribe prompts you, set the Deliberated Law to 2.

“I don’t think we are taking the Greek threat seriously enough, so let’s say everyone has to Deploy at least 2 Troops per round.”

3. After setting the Threshold of the new Deliberated Law,

“There are still Greeks left, so we will play another round.”

Action Phase

- At some point in the next round, subtly **scheme** against the Chief Scribe with yourself as the Receiver.
 - Choose a scheme card that has a “\$R” from your hand and grab a card marker for the Chief Scribe and one of your own from your pouch.
 - Put the Chief Scribe’s card marker on the top of the scheme card (the target of the scheme) and yours on the bottom (the Receiver of the scheme).
 - Put the marked scheme card into the pouch with all the rest of the card markers.
 - Put your Spy into the pouch.
1. **Undermarket Monetize** using Law and Scheme cards
 2. **Sue** the Crime Lord
 3. **Recruit**
 4. **Deploy**

Report Phase

1. After Edicts have been checked,

“It’s time for what will likely be the last battle. The player who deployed the most Troops becomes the General and gets 1 Honor. The player who deployed the least Troops is in danger. This round, we must fight ___ Greeks, but there are only ___ Greeks left. If we deployed more Troops or tied the Greeks, we win the battle and everyone who deployed Troops gets 1 Honor, including the General.”

2. After setting the Threshold of the new Deliberated Law,

“There are no more Greeks left, so the game is over! Time to score final points.”
